2024

Background:

Koraput Farmers Association (KFA) came into being in the year 1999 and was incorporated under the societies Registration Act in the year 2000-2001. Koraput is naturally well-endowed district in southern odisha. The district is considered most backward with low development index with majority of indigenous tribal population .Born with a purpose to be a voice for the farmers and advocating their rights, helping them leverage the government schemes and improving their livelihood, KFA has come a long way in it's two decades of journey .Besides working with the farmers, the KFA is actively working in the cross sectoral programmes. KFA is working with the children in the field of elementary education and their rights and livelihood enhancement of person with Disabilities (PwD). It has partnered with government, academic/research institutions, non-government organization, international non-government organization and international research institution at different points of time. It worked relentlessly to bring in new technology and innovation to the ground level to improve productivity, market access and livelihood enhancement for the community .KFA strongly believes that it can only work as a catalyst where people have to take the responsibility of their own development.

Our Vision:

“We would like to see the vulnerable and underserved communities live with dignity and in a self – reliant way, where they can assert their rights ,entitlements and efficiently participate in overall growth and development of the society.”

Our Mission:

“To work closely with vulnerable groups like tribal and dalit in general and women, youth and children in particular so that they steer the process of development through sustainable use of natural resource base by using their traditional knowledge and better use of innovative scientific practices, enhancing their livelihoods and asserting their rights and entitlements.”
